Clothing and Baggage

From the evolving itinerary, you will get a feel for the kinds of activities we will undertake. Remember that we will be actively walking and in transit for much of the time, so wear comfortable footwear and clothes – perhaps not much different to what you wear on campus. You will need closed toed shoes and covered arms and legs for at least one of the visits. New Zealand will be in late summer in March so bring layers and raingear. Long pants, and polypro/fleece would be appropriate. Boots or closed toed shoes are necessary. Both sunscreen and a hat may be useful.

We will be spending our overnights in hostels, usually with dormitory accommodation. These are typically moderately secure for baggage and valuables (often small shared and lockable rooms) but other options will be to leave these in the vehicle(s) or on your person. A secure location, on your person, for your money and travel documents is often useful. I usually keep my passport with my wallet in my (cargo) pant pocket – for the duration. It is sometimes useful to keep a **photocopy of your passport** in your baggage or email yourself a scan of the front page and keep it on your webmail.

For travel in the vans, it is preferable to pack in soft bags, and to travel as light as is comfortable. Remember sunscreen, hat (sun), and sunglasses, if needed and raingear (jacket).

I plan to wear what I wear on campus every day - light hiking boots, shirt and fleece for most of the trip, and to have an extra fleece layer and waterproof/windproof shell. Swimwear will be fine (there are geothermal pools) and bring a light towel as the hostels don't necessarily supply them. If you are not checking your bag on the international flight remember that liquids in your toiletries (sunscreen, toothpaste, shampoo) should be in small containers and available for inspection.

Passport

You **MUST** have a valid passport. You should obtain any visa/documentation necessary for your travel. If you are traveling on a US passport, you will need **to apply online for an electronic travel authorization** for New Zealand (NZETA) at least **72 hrs in advance of travel:** <https://www.immigration.govt.nz/new-zealand-visas/apply-for-a-visa/about-visa/nzeta>

Your Out-of-pocket Expenses

We will pay for your accommodation (hostel fees), and for in-country travel. You will need cash for your meals and other incidentals or credit or debit cards. Most hostels will have self-catering facilities, and you will have the opportunity to pool resources to group-cook, should you wish. You will purchase your own air travel.

Miscellaneous

Remember to bring some method (small notebook or tablet (electronic or paper)) to keep a journal. One that fits into your pocket or pack may be most convenient. Bring a camera or smartphone for photos. You will be able to find Wi-Fi at all hostels if you don't have a phone plan. Wi-Fi is available at coffee shops, restaurants and hostels but is neither as ubiquitous nor as cheap as in the US. Remember to keep any phone on airplane/non-roaming mode to avoid disastrous (\$100s-\$1000s) roaming charges. An ATM card or Visa/Mastercard/Amex/Diners will likely be the best method to transport cash. You may wish to notify your credit card company that you will travel to New Zealand as sometimes they suspend cards with suspicious activity – this is easily rectified with an email or logon to your account website after the fact. The voltage is 230V and you'll need a plug (definitely) and voltage converter if your recharger is not dual 110/230V (almost all are).

PARTICIPANT DELIVERABLES

Pre-Trip

1. Review the Itinerary, inclusive of hotlinks, as an overview.
2. Complete background research for your assigned venue/topic (as assigned below) and be prepared to introduce this to the group. For your peers, consider what do they need to know about the locale? How is it relevant to the theme of our course? Is there an historical significance or context? Where is it (geographically)? Is there something related that we should see, either in addition or in preference? Introductions should give a Wiki-like overview of

the relevant pints, taking maybe 5 minutes, without visual aids, except maybe the view.

During-Trip

1. Keep a journal of your activities and observations, related both to your planned topical presentation (final course deliverable) and to our daily activities. Bring a notebook/tablet (paper or electronic) that you can comfortably carry in a pocket or pack. Morning or afternoon dispatches are as identified below, **in red**.
2. You have two assignments while we travel, potentially on two separate days:
 - a. A 5 minute “vanside” discussion to inform your colleagues about your assigned topic below and on the assigned date. As noted below in black type (e.g. Rotowaro mine on Mo 9th for AA).
 - b. Complete a brief electronic dispatch as a summary of the (technical) activities for your assigned morning or afternoon as noted **in red type** (9pm is for afternoon of the 9th March) to be posted on our return. It should highlight observations relevant to the theme of the course. See some examples at: https://www.ems.psu.edu/~elsworth/courses/egee_497/2017/index.html

Mo 9 th	AA	9pm	Rotowaro Mine and fuel supplies to Huntly power station
Mo 9 th	ZB	10am	Coalbed methane(CBM)/coalseam gas(CSG) in NZ
Tu 10 th	MF	10pm	Hydropower on the Waikato River
Th 12 th	RG	11am	Taranaki/Stratford onshore oil field
Th 12 th	MGK	11pm	Offshore oil/gas and Methanex gas-to-liquids plant
Th 12 th	EL	12am	Government initiatives for carbon reduction in New Zealand
Fr 13 th	ZM	12pm	Cook Strait tidal power potential and plans
Fr 13 th		13am	Hydropower potential and utilization on the South Island

Post-Trip

April 2 - class

1. Outline presentation topic in class. ~5 mins. Single ppt slide. Title/Objective/Approach/Expected-results
2. Submit your final electronic dispatch for posting (canvas).

April 23 - class

1. Final presentation (~15 min per person) on an investigative topic of your choice.
