

**On the basis of your reading of the relevant literature, indicate whether the following statements are true or false and briefly document/justify your selection.**

T/F It is relatively easy to identify, either in a paper cited by Faber (2017) or in the paper itself, an argument that provides support for the payback period mentioned in the Conclusions and thus facilitates the understanding of its economic significance.

Available in Web of Science?

T/F It is relatively easy to understand the relationship between Figure 4 and Table 2 in the paper by Faber (2017).

Argument?

T It is relatively easy to identify a graph in a cited reference, or at least an argument, which justifies the need for a (relatively sophisticated?) statistical analysis presented by Monge *et al.* (2017).

"wavelet methodologies" → US oil production vs. WTI \$  
(before and after shale oil boom)  
↓  
Ref to OK?

T/F It is relatively easy to identify at least one paper that discusses the same issues (and arrives at similar conclusions?) as Monge *et al.* (2017).
