Adsorption Regeneration

Note the range of these estimates.

\[ \text{Adsorbent (g)} \times \frac{2}{100} = \text{Viscosity (cP)} \]

From Eq. (12.1) we obtain

\[ \text{Adsorbent (g)} \times \frac{2}{100} = \text{Viscosity (cP)} \]

\[ \text{Substituting the preceding values into Eq. (12.1)} \]

\[ \text{We obtain} \]

\[ \text{From Appendix B,} \]

\[ \frac{1}{\text{Adsorbent (g)}} \times \frac{2}{100} = \text{Viscosity (cP)} \]

\[ \text{Assume that} \]
